

#### Dear Clients and Friends:

The purpose of this letter is to address the non-cash fringe benefit computation associated with the personal use of company owned or leased automobiles by an employee. "Written Policy Statements" are enclosed for situations where employee personal use is prohibited or limited to commuting.

Generally, the most common method by which the Internal Revenue Service and our clients value this non-cash fringe benefit is through the use of the Annual Lease Value Method ("ALV Method"). The ALV Method is used to compute the value of the fringe benefit by using a table, which is prescribed by the Internal Revenue Service and uses the fair market value of the automobile as the basis for the computation.

The actual Annual Lease Value Method is detailed on the enclosed form entitled, "Determining the Fringe Benefit of an Employer-Provided Vehicle." For those employers calculating their own employee fringe benefit values, this form should be utilized and maintained in the Company's permanent records.

Note that if the ALV Method has been used in prior years, and an automobile has been used for more than four-full years, its fair market value must be re-determined at the start of the fifth year to calculate the fringe benefit associated with its use. Thus, all automobiles that have been in use since January 1, 2013 will have to be re-valued using the automobile's fair market value on January 1, 2017. The "Annual Lease Value Table" is enclosed for your reference.

If you use the "special accounting rule" for fringe benefits, you can figure the annual lease value for each later four-year period at the beginning of the special accounting period (November 1 to October 31 or December 1 to November 30) that starts immediately before the January 1 date described above.

The "Vehicle Information Summary – Non-Cash Fringe Benefit Computation" Form must be completed by the employee. The form is used to determine the actual business use of the automobile. When completing this form, the mileage is that which was accumulated during the calendar year (or special accounting period).

The value of the fringe benefit must be included in the employee's federal Form W-2 and taxable income for 2017. This amount is not subject to Pennsylvania state taxes in 2017.

With respect to employee federal income tax withholdings on the fringe benefit value, we suggest that the employer elect not to withhold these taxes. A memorandum titled "Employer Notification of Elections Concerning the Personal Use of Employer-Provided Automobiles" is enclosed for distribution and completion by the employee. This form should be signed by each employee on an annual basis. The value of the fringe benefit is subject to FICA and Medicare tax and appropriate withholding will be necessary prior to December 31, 2017.

The forms referred to above must be completed as instructed; there are no exceptions. If you would like us to perform the calculations, please provide us with the necessary information to complete the forms for each eligible employee. If we perform the calculations, we will then maintain these forms as part of your tax files for the applicable year.

When properly completed, the information listed on the enclosed forms will provide the employer with the ability to only report as a fringe benefit (on employee's W-2) the value of the personal use of an automobile. If an employer does not have sufficient information to calculate the personal use portion, the entire value (both business and personal use) is reported on the Form W-2.

If the business and personal use value is reported on the Form W-2, the employee may deduct his/her business use of the automobile on his/her personal tax return, but only as a miscellaneous itemized deduction. Miscellaneous itemized deductions must first be reduced by 2% of adjusted gross income before being added to all other itemized deductions. The employee may only receive a benefit from the deduction if all of his/her itemized deductions exceed the standard deduction. Thus, it is in the employee's best interest to make certain that only the personal use portion is reported on the Form W-2.

If you have any questions regarding completion of the enclosed forms, or the calculation of the benefit, please do not hesitate to contact our office.

Sincerely,

Herbein + Company, Inc.

1.	Number of personal use miles driven during	the year.	
2.	Multiply line 1 of applicable IRS rule.		x .535

If cents-per-mile is used for a particular vehicle, it must be used for as long as the vehicle is owned by the employer and must be selected in the year the vehicle is first used for personal purposes.

Value of fringe benefit (line 1 x line 2).

3.

The vehicle must be used primarily by an employee. The rate includes the fair market value of maintenance and insurance for the vehicle. For miles driven in the United States, its territories and possessions, Canada, and Mexico, the cents-per-mile rate includes the value of fuel provided. If fuel is not provided by the employer, the cents-per-mile rate may be reduced by no more than 5.5 cents. Once the vehicle cents-per-mile rule has been adopted, it must be used for all subsequent years in which the vehicle qualifies for use of the rule.

<u>Automobile Lease Value:</u> This method is utilized when both the commuting rule and cents-per-mile rule are not available.

For vehicles having a fair value in excess of \$59,999, the Annual Lease Value is equal to: (.25 x the market value of the automobile) + \$500. Each annual lease value in the table includes the value of maintenance and insurance for the automobile. The annual lease value does not include the value of fuel provided to an employee for personal use. You must include the value of the fuel separately in the employee's wages at FMV or at 5.5 cents per mile for all miles driven in the United States. The fuel value is the amount charged to the employer or cost reimbursed.
